

2-MINUTE ROOF CHECK

CAN MY ROOF BE RESTORED?

Answer six quick questions to see if
your asphalt shingle roof could be restored.

Designed for qualifying asphalt shingle roofs. Actual savings and timelines vary by project.

A QUICK ROOF CHECK

Roof restoration is not right for every roof. Use this self-assessment to decide whether a professional inspection is worth scheduling.

01 Is your roof made of asphalt shingles?

☐ Yes ☐ No ☐ Not sure

Seal Tech Roof Restoration is designed for qualifying asphalt shingle roofs.

02 Is your roof showing signs of aging, fading, dryness, or granule loss?

☐ Yes ☐ No ☐ Not sure

These are common signs that roof restoration may be worth exploring.

03 Is your roof generally intact, without severe leaks or widespread water damage?

☐ Yes ☐ No ☐ Not sure

Roofs without severe water damage may be better candidates for restoration, depending on their overall condition.

KEEP GOING

WHAT DOES YOUR ROOF NEED?

These questions help separate surface aging from conditions that may require more extensive work.

04 Are most of your shingles still in place, without large areas that are missing or severely damaged?

☐ Yes ☐ No ☐ Not sure

If most of your shingles are still intact, restoration may be an option worth evaluating.

05 Would you prefer to avoid the cost, mess, and disruption of a full roof replacement if possible?

☐ Yes ☐ No

Restoration may provide a lower-cost, lower-disruption alternative for qualifying roofs.

06 Would you consider restoring your existing roof if a professional confirms it is a good candidate?

☐ Yes ☐ No

A professional inspection can determine whether restoration is appropriate for your roof.
